1. ShareDev

1.1. Hashes

1.2. Cryptographic Identities

1.3. Master Domain, Master Key

1.4. Filters: Blacklists and Whitelists

1.5. Site List

1.6. Build Files

1.7. In-memory Cache

1.8. Disk Cache

1.9. Retrieval from the Net

1.10. HTTP Protocol Version Support

1.11. Dependencies

ShareDev depends upon a number of other XLattice components. At the time of writing these are

- util-0.3. x .jar
- corexml-0.3. x .jar

Current jars for all dependencies will be included in the CryptoServer distribution, excepting only Java's runtime libraries.

1.12. Security
